

# PARK OR PLACE

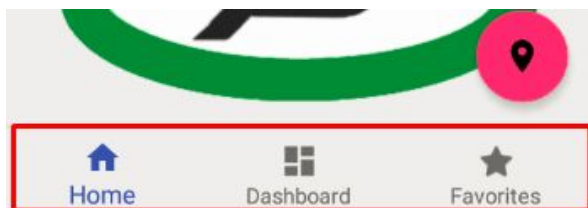

Why have one when you can have both

## Start up

On start-up, app will navigate to an empty screen with just our logo. This is the home screen.

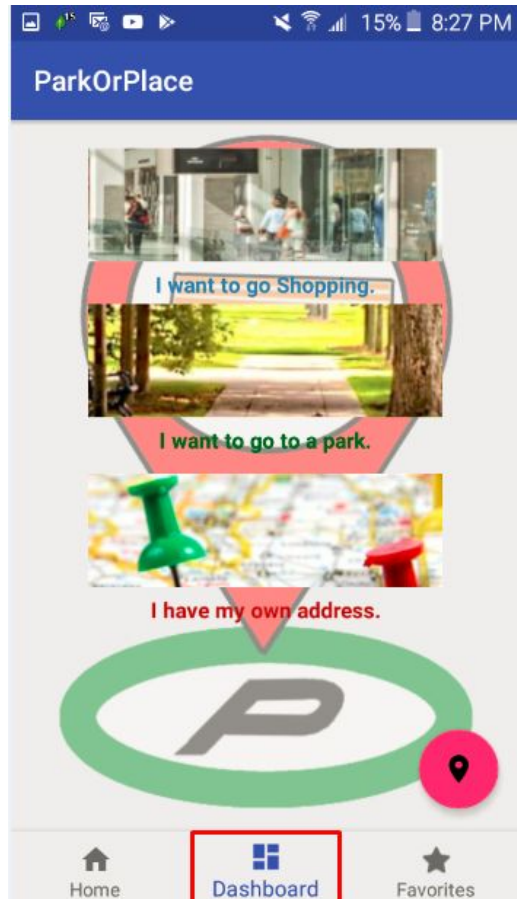

Note the navigation bar on the bottom of the page. This is how you can get around in our app, just like how our app can help you get around New Westminster.

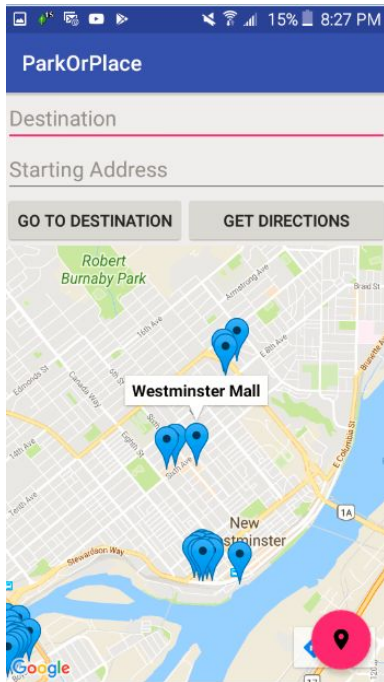

## The Dashboard - “Where do you want to go?”

Click on the middle button, named “Dashboard”, brings up a Dashboard screen, where you can choose the type of destination of your trip.

## Shopping Malls

Once on the Dashboard screen, click the first image titled “I want to go shopping” to bring up all the malls in New Westminster.

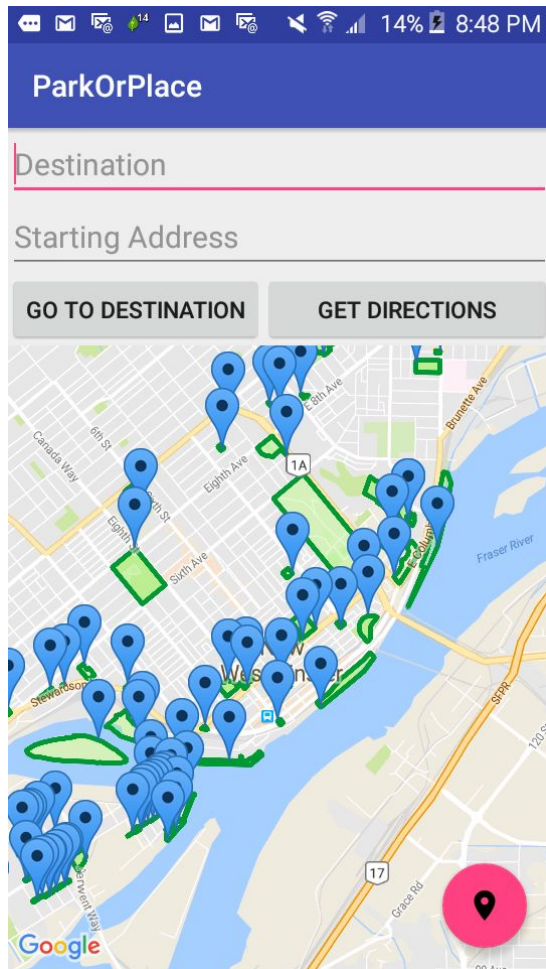

Each mall is located at one of the blue markers on the map. Blue markers are always used for points of interest.

Click the back button on your phone to return to the Dashboard.

## Parks

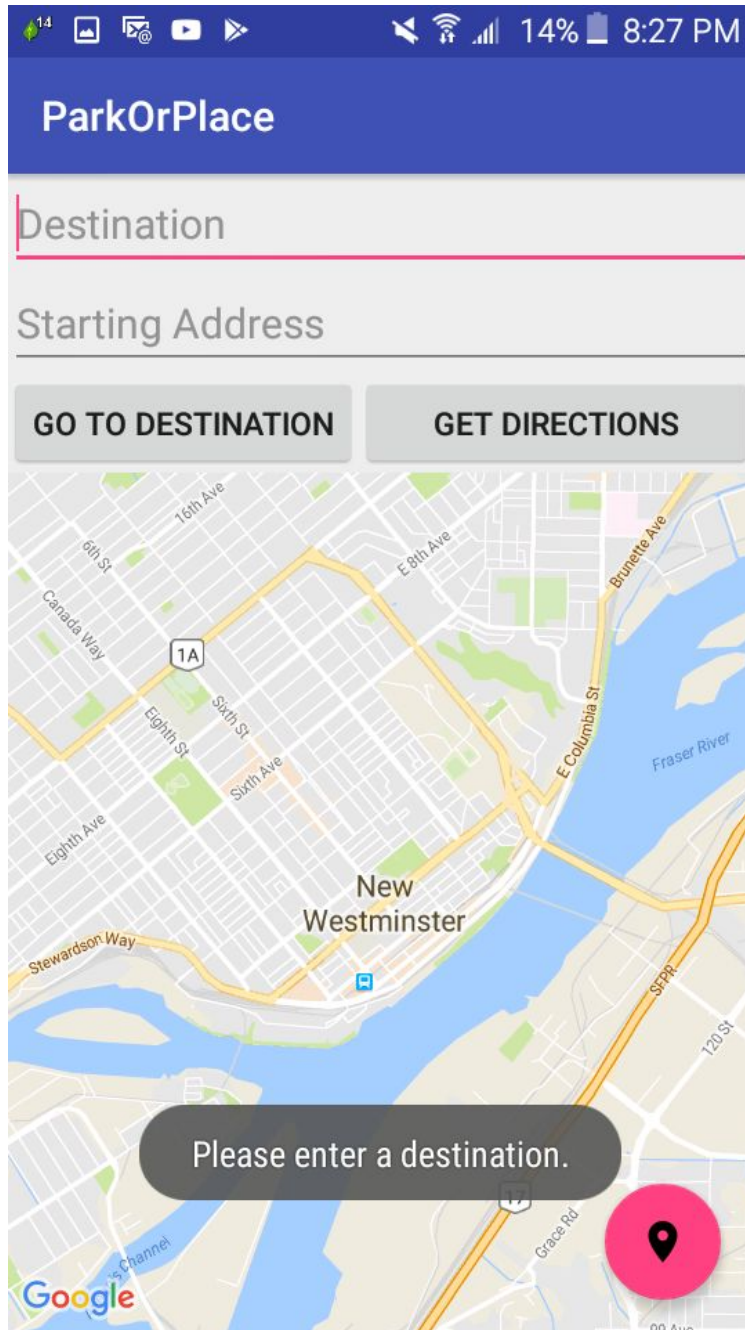

Once on the Dashboard screen, click the second image titled “I want to go to a park” to bring up all the parks in New Westminster. Due to the sheer number of parks in New Westminster, there is a small loading screen before the map finishes displaying them all. But it should finish loading within 10 seconds.

Click the back button on your phone to return to the Dashboard.

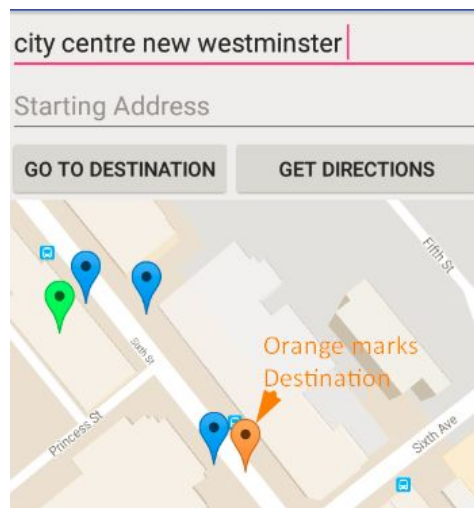

## Custom Address

Once on the Dashboard screen, click the third image titled “I have my own address” to go directly to the map. A prompt will briefly display, suggesting you to enter a destination.

The map will move directly over New Westminster.

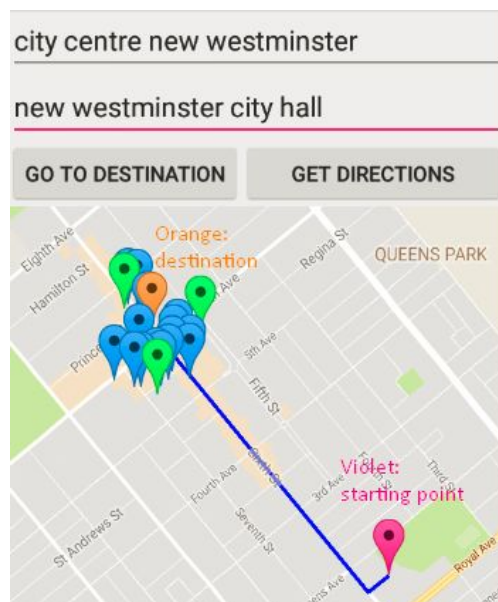

Enter an address in the destination field (make sure to enter the city as well to ensure accuracy), and click go to destination. The map will zoom in to your destination, and add an orange marker at that location. Orange markers are always used starting destinations.

## Get directions

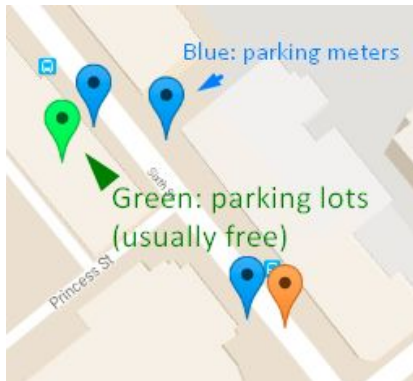

Enter an address in both the destination field (make sure to enter the city as well to ensure accuracy), and the "Starting Address" field, then click get direction. The map will draw a blue line between the two addresses and zoom to your starting address. This is the optimal route by car to your destination.

A violet marker will be added to your starting address, and an orange marker to your starting point.

## Parking

Throughout this guide, you may have noticed blue or green markers popping up on the map when you search for a route or destination. Those are parking lots near your destination.

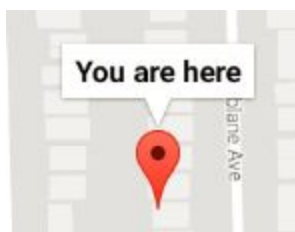

- The blue markers are parking pay stations. They are displayed in a 200m radius around your destination.
- The green markers are free parking lots and parkades. They are displayed in a 500m radius around your destination. So you'll see this more often than the blue markers.

## Where Am I?

Wherever you are in our app, there is always a pink circle with a marker icon in the bottom right corner. This is the “You are here” button.

Click on this button at any time to go to your current location on the map, indicated by a red marker titled “You are here”. Note this won’t bring up any parking by default, you’ll need to set this as the destination to bring up parking around you \*see set marker as address below.

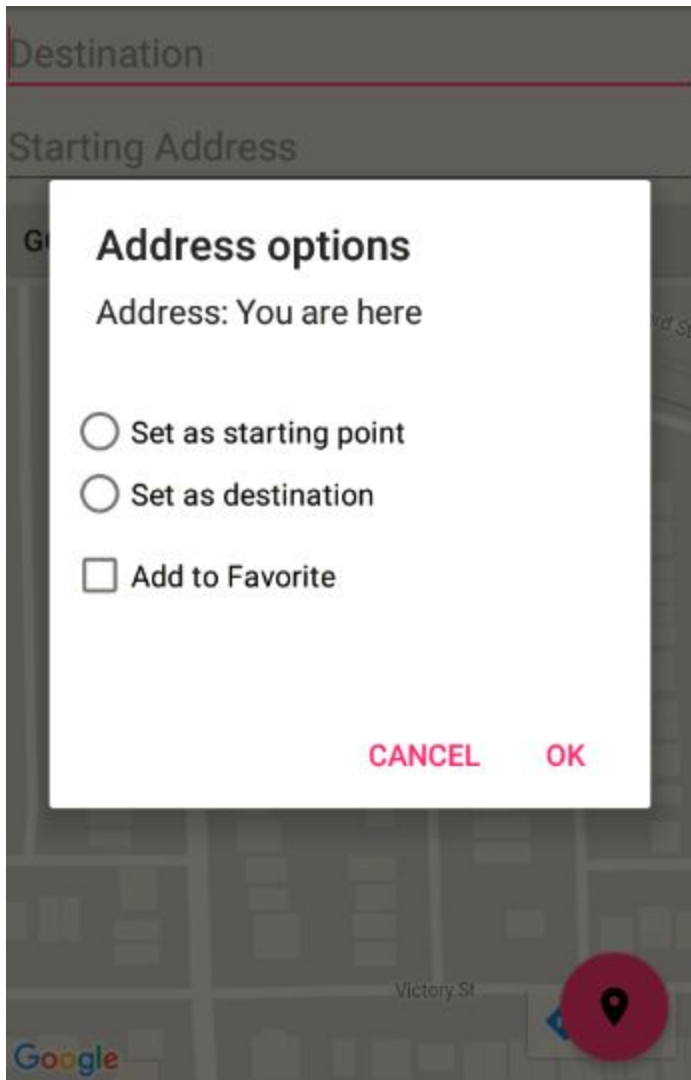

## Advanced Marker Functions

Proceed once you're comfortable with the basic functions of the app above.

### Set marker as address

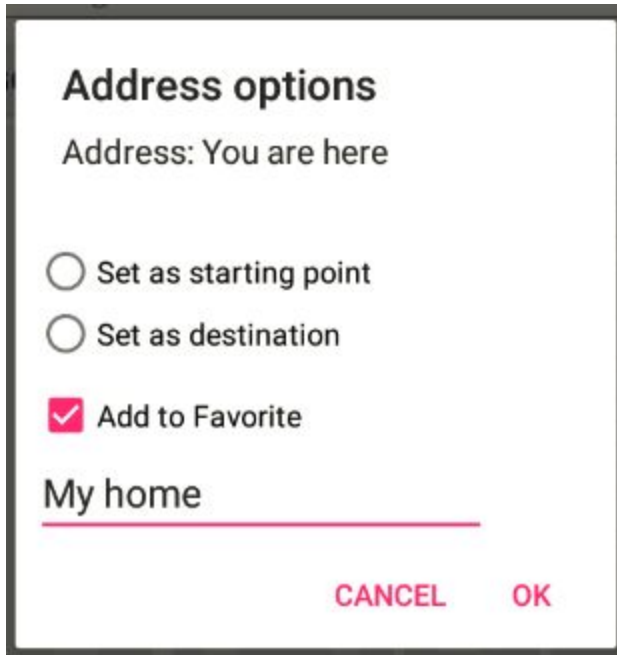

Clicking on any marker (including your current address) brings up the title of the marker. Click on that title tab to bring up an options menu.

Clicking either the “set as starting address” or “set as destination”, then clicking OK fills in the Destination or Starting Address fields with the full address of the marker.

## Favourites

In the option menu that pops up when u click on a marker title also includes an “Add to Favourite” checkbox to save it as a favourite. Hit Ok to save.

A dialog box titled "Address options" with a white background and a dark border. It contains the text "Address: You are here" followed by three radio button options: "Set as starting point", "Set as destination", and "Add to Favorite" (which is checked with a red checkmark). Below these options is a text input field containing "My home" with a red underline. At the bottom right are two red buttons labeled "CANCEL" and "OK".

**Address options**

Address: You are here

☐ Set as starting point

☐ Set as destination

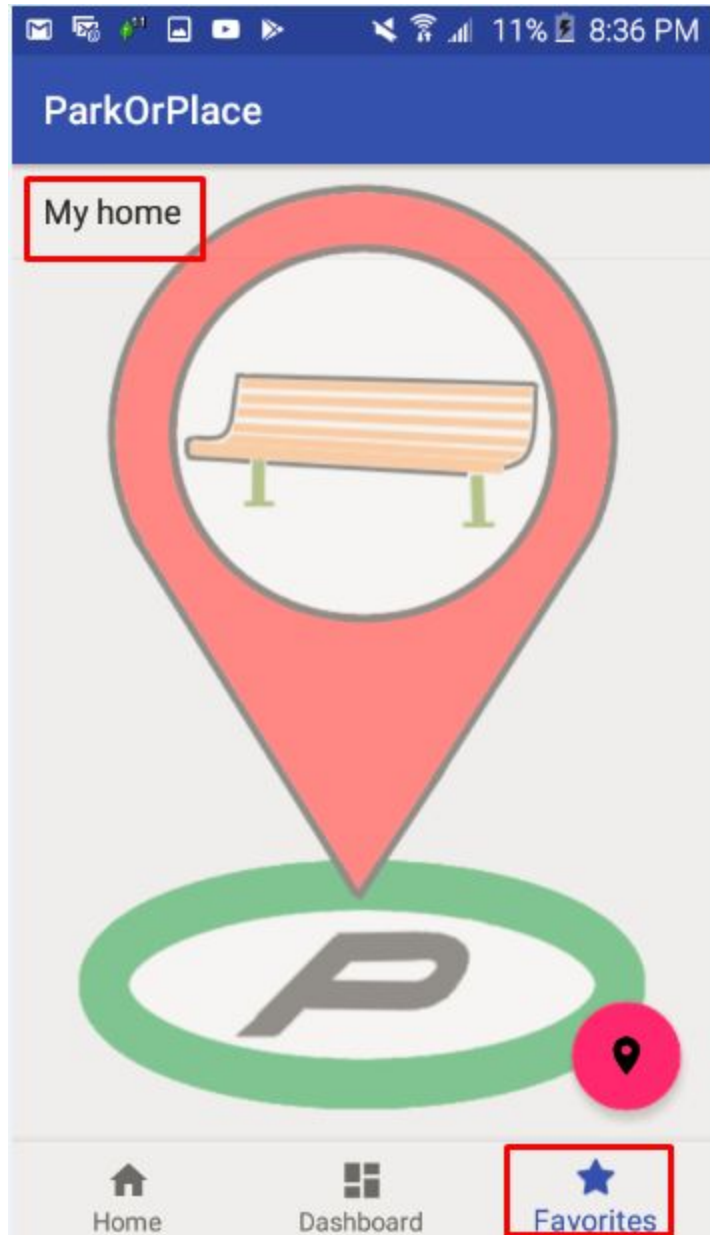

☒ Add to Favorite

My home

CANCEL OK

Back in the home screen, on the navigation bar on the bottom, there's a third button, favourites, which brings up the favourites screen.

This screen, which is empty by default, should contain the favourite you've added in the last step. Click on it to quickly set it as your destination.

To remove a marker, simply click on its marker title again in the map, and uncheck the Add to Favourite checkbox, then hit OK.

To rename a marker, simply click on its marker title again in the map. Leave the Add to Favourite checkbox unchanged, and change the name, then hit OK.
